PlanetGroup, operating for over 20 years in stationery field as manufacturer and distributor, increases its environmental commitment and introduces a new product: Recycled labels.

Planet Recycled labels is a conscious choice made by Planet to make its contribution to the cause of environmental liability and to respond to customer's needs.

The new self adhesive label line, produced with 100 % recycled raw materials, is recognized by a new green box; this colour reminds of forests and nature which all of us has to protect.

This new product guarantees during the whole production process, the use and presence of raw material at low ecological impact: from self adhesive labels to packing.

Thanks to its new Eco-friendly label line, our company combines innovation and tradition without losing quality.

Recycled label is suitable for all kinds of ink-jet printers and copiers; it's included in PlanetOne label line, so it has safety edge to avoid the leakage of glue during the printing process. This white self adhesive label is packed in 100 sheets boxes, the water based adhesive guarantees the same adhesion as others labels.

Planet confirms its environmental efforts relying on FSC (**Forest Stewardship Council**) **certificated suppliers, which promote the environmental protection through the use of raw materials coming from environmentally responsible forestry. Our product quality is always the same, what we change is our thinking that now is more..." Green".**

Planet also introduces new 500 and 1400 sheets packing to reduce the use of carton and boxes while offers an economical saving. The environmental liability depend on the waste reduction, which thanks to our new packing can be cut and become a successful result.

The 10 or 20 sheets carton cases were replaced by transparent envelope totally recyclable.

Our company policy focuses on waste product reduction, for this reason PlanetGroup, certificated ISO 9001:2008, has as annual objective the reduction of production waste. The achievement of this goal requests high technology machineries and a qualified and professional team but it allows ourselves to pursue the protection of the natural environment.

Planet_SoftLabel

Planet_SoftLabel

This software designed by Planet for its customers is free and at your complete disposal.

Perfect for designing and printing labels, CD cases or inserts, business cards, brochures in all sizes present in our catalogue.

More than 1000 sizes are included in our software and thanks to fast and easy instructions all of them can be found and used for all of your creations.

Planet_SoftLabel has got different tools allowing you to create text, change colours, import and export images, rotate or fit each object.

For all users with Windows operating system

Planet_SoftLabel_Download free on www.planet-group.it

**useful, fast, for everyone ...
try it, it's free**

what's SoftLabel

It's the new software for Windows operating system; ideal for designing and printing labels, CD inserts, business cards and brochures included in Planet new catalogue.

hardware requirements

- *Microsoft Windows 2000 Server with SP4_ Microsoft Windows XP with SP2_ Microsoft Windows Server 2003_ Microsoft Windows Server 2008_ Microsoft Windows Vista_ Microsoft Windows 7*
- *512 MB hard disk space*

what's the use

PlanetSoftLabel allows you to customize and print in a fast and professional way all Planet products including all texts and images that your creativity suggests you.

easy to use

PlanetSoftLabel has got a wide range of tools allowing you to customize your Planet products in few easy steps:

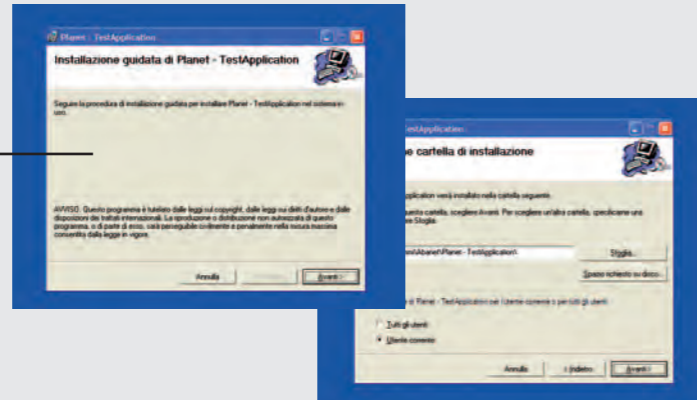

- *download and install the software*
- *work out your project thanks to all tools at your disposal*
- *print*

install and print in 5 steps

quick install

link to www.planet-group.it, find and download PlanetSoftLabel on the proper area. During the installation, the software itself will guide and help you step by step.

dialog helping you step by step

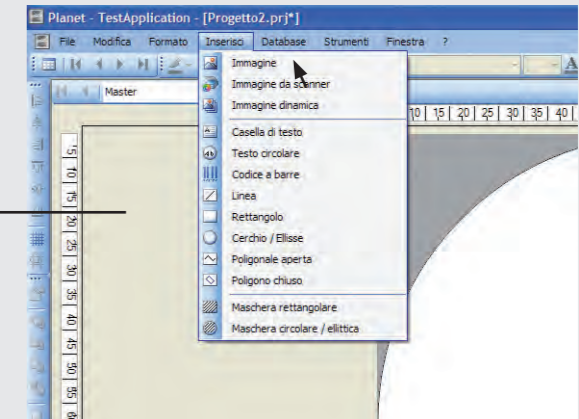

1

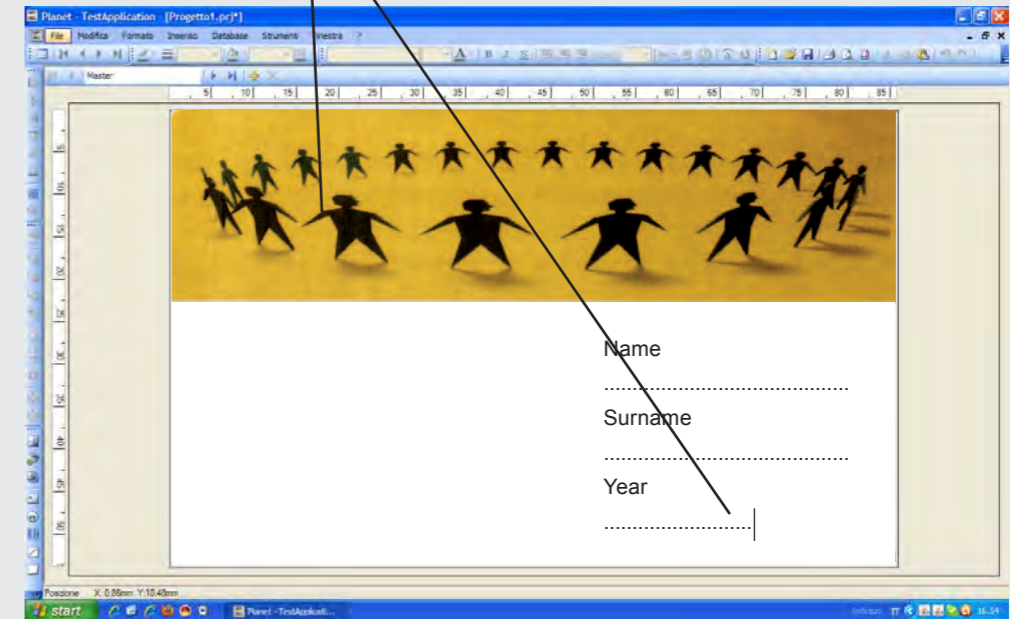

work out your project

insert text, change colour, import images, move on object or rotate it.

The pull-down menu allows you to choose the needed tool

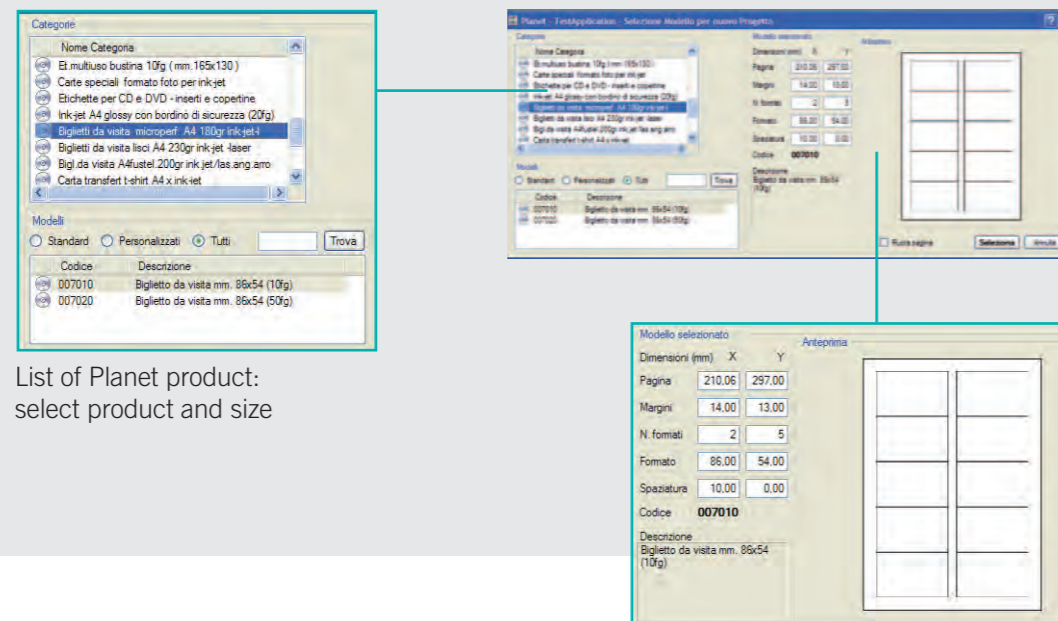

import image and fit it in accordance to your needs then insert your text

open the software and select the size

more than 1000 sizes are included inside the software. Thanks to a quick and easy tool you can find the needed size to create your customized product.

List of Planet product: select product and size

size, description and preview of selected product

2

3

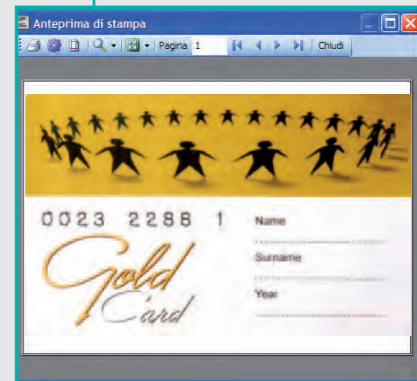

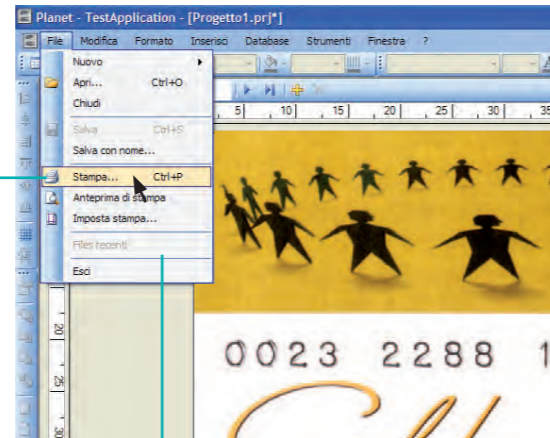

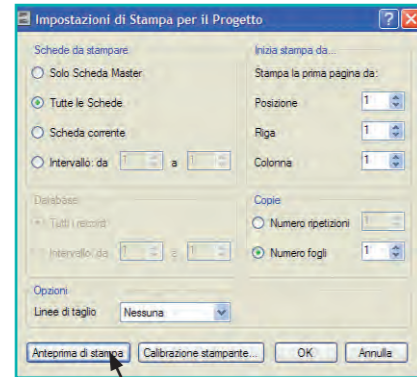

11

118

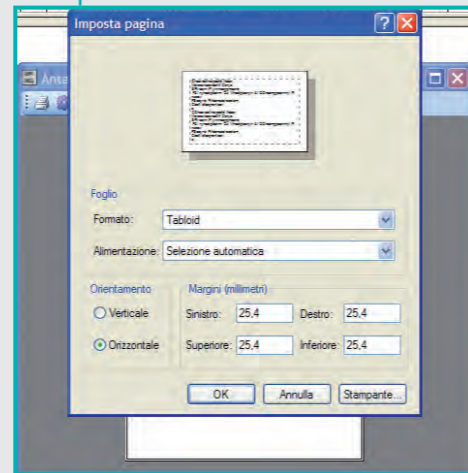

print your project

SoftLabel helps you step by step to set up the printing, showing you the print preview, too

the printing tool allows you to modify the **print settings of your project in accordance to your needs.**

Thanks to print preview tool you can see the result of your work before printing

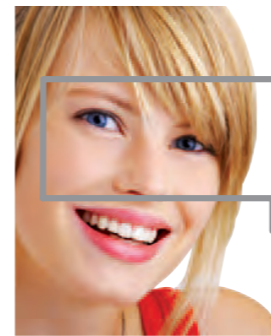

the **page setup tool** allows you to select **the sheet size, the sheet position** as well as the printer

4

well done!

In 5 steps you can have at your disposal labels, business cards, photos, CD cases. 5 steps to create in a quick and easy way your projects and get a professional result.

5

try it, it's free!
